

Frost & Sullivan Recognizes Luceo Technologies for its Price Performance Value Leadership in the BERT Market.

“Luceo Technologies GmbH is a key market participant in the bit error rate testers (BERT) market. The X-BERT and PARALLEX products are highly competitive in nature and are offered at a very affordable price” says Sujan Sami, Industry Manager, Measurement & Instrumentation, Frost & Sullivan.

“Customers think highly of Luceo’s products, highlighting price-performance value as the key factor for selecting the company’s products. With existing customers willing to purchase future products from Luceo as well as demand coming from new customers, the company’s recognition is growing in the market. As a result, Luceo is expected to grow its market share in the BERT market in the future.”

“I am proud and happy, that the hard work our team performed over the past years found it’s recognition on the world market.” says Stephan Mannshardt, CEO of LUCEO Technologies. “Key factors are the high expertise of our team members and the high German quality standard.”

About LUCEO

LUCEO Technologies GmbH was created by engineers involved in electrical circuit and optical transceiver design, who recognized critical gaps in test and measurement equipment for optical component and transceiver characterization. Luceo's test system is the first to combine a complete BERT test solution, with affordable cost and German build quality. Targeted at high volume production test applications, Luceo's equipment optimizes speed and ease-of-use, allowing users to achieve minimum cost-per-test. Founded in 2005, Luceo is headquartered in Berlin, Germany. For more information, visit www.luceotec.com
